

NS540 Session 4 (At-home Session) – Instructions

All of this material is posted on this web site:

<http://physics.bu.edu/~duffy/NS540.html>

1. First, work through the worksheets, to see how comfortable you are with the concepts regarding motion in two dimensions before you do any of the reading.
2. Read through the reading material that is posted on the course web site, or the relevant sections from the Cutnell & Johnson book (or both). If you print out the reading material from the web site, printing on a color printer is best.
3. Work through the worksheets again – these are to be handed in at the next session. The last page involves you working with a Phet simulation. There is a link to the Phet simulation from our course web site above.

If you have questions about the material, or you'd like to comment on any aspect of the process, please use the discussion board that is on the NS540 WebCT site. The web address for BU's WebCT site is:

<http://webct.bu.edu>

Look for the course link for our course, or use the “my WebCT” link”

We will try to monitor the discussion board and post replies in a timely manner. Please feel free to reply to other people's questions and comments, though.

Teachers in the Boston group can e-mail Manher directly at manher@bu.edu

Teachers in the Chicopee group can e-mail Andrew directly at aduffy@bu.edu
