There are two errors in this paper:

1. Five lines after Eq. (11), the joining condition should read $\mathcal{E}^{\rm II}(L-b) = q\mathcal{E}^{\rm I}(L-b-1)+p$.

2. In Eq. (12), the first equality should read:

$$\mathcal{E}^{\rm I}(x) = 1-q^x - \frac{x\,p\,q^{x+b}}{1-ypq^b}\ .$$

   This equality follows from the calculational steps outlined in the previous paragraph of the paper; only the result quoted in Eq. (12) is incorrect.

We thank Dr. Dror Parnes for pointing out these errors.
